

VELTEKO

DOSING DEVICES

**FROM
PIECES
TO POWDERS**

Our comprehensive range of dosing machines are designed for dosing a wide variety of both food and non-food products. They are not only reliable, easy to clean, and product-friendly, but also easy to set up and maintain.

DOT1

DOT3D

DOK

DOT1 and DOT3D Volumetric Frictional Fillers

- ❑ Used for non-abrasive fine pieced products – Coffee beans, legumes, rice, candy, etc.
- ❑ Dosed volumes of up to 1,700 cm³
- ❑ Maximum speed: DOT1 **up to 140 doses/min.**
DOT3D **up to 360 doses/min.**
- ❑ Standard equipment includes a dust collecting hood that is exhaust system ready
- ❑ Optional adjustment of dosing amount from packaging machine's display

DOK Volumetric Flap Filler

- ❑ Used for abrasive products – Sugar, salt, etc.
- ❑ Dosed volumes of up to 8,810 cm³
- ❑ Maximum speed of **100 doses/min.**
- ❑ Standard equipment includes a dust collecting hood that is exhaust system ready
- ❑ Optional adjustment of dosing amount from packaging machine's display

DOS

DOS3D

HS

DOS and DOS3D Auger Fillers

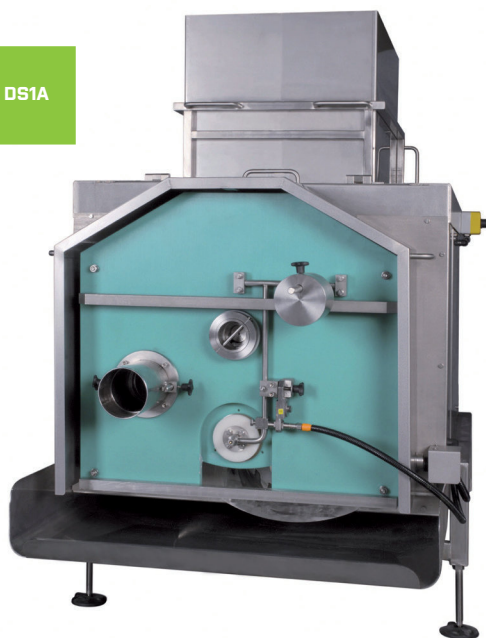

- ❑ Used for powders – Milled spices, milled coffee, powdered milk, flour mixes, instant drinks, etc.
- ❑ Optional servo-driven dosing auger
- ❑ Maximum speed: DOS **up to 120 doses/min.**
DOS3D **up to 240 doses/min.**
- ❑ Additional accessories – Auger feeder, inert gas dosing, forced closing of filling tube, tube ventilation
- ❑ Optional weigher with auger filling – HS.S1 – Ability to set operational parameters from a mobile phone or tablet

HS line of Vibratory Weighers

- ❑ Used for powdered, granular and pieced products – Pasta, spices, pet food, dried fruit, tea, frozen products, grated cheese, glass beads, etc.
- ❑ Suitable for creating mixes
- ❑ Possibility of manual dosing into pre-made packages
- ❑ Modular construction for multi-line installations
- ❑ Automatic tarring
- ❑ Maximum speed of **15 doses/min.** (with one line weigher)
- ❑ Ability to set operational parameters from a mobile phone or tablet

DS1A

HS.P.A

YAMATO

DS1A and DS7 Sauerkraut Fillers and DS8 Liquid Filler

- Volumetric dosing of sauerkraut and liquid
- Stainless steel construction
- DS1A Filler – doses from 300–1,000 g (without liquid)
- DS7 Filler – doses from 3,000–5,000 g (without liquid)
- Maximum speed for DS1A + DS8 – **40 doses/min.** (500 g)
- Maximum speed for DS7 + DS8 – **10 doses/min.** (5,000 g)

HS.P.A Belt Weighers

- For pieced products (granulates) such as pet food, wooden pellets, animal feed mixtures, plastics, etc.
- Ideal for big volume dosing (10–60 dm³)
- Modular construction for multi-line installations
- Ease of control using a full-color touch screen
- Small footprint
- Maximum speed of **10 doses/min.** (with one line weigher)
- Ability to set operational parameters from a mobile phone or tablet

YAMATO Multihead Weighers

- For small-pieced products – Candy, chips, pet food, vegetable pieces, pastries, frozen products, vegetable mixes and salads, grated cheese, selected meat products, etc.
- Maximum speed of **300 portions/min.**
